

Atlas Of Clinical Ophthalmology

The Color Atlas and Synopsis of Clinical Ophthalmology was developed at Philadelphia's famed Wills Eye Institute. The beauty of this series is the powerful combination of illustrative photographs and a summary approach to the text. While the seven ophthalmic subspecialties in this series, Cornea, Retina, Glaucoma, Oculoplastics, Neuroophthalmology, Pediatrics, and Uveitis, employ varying levels of visual recognition, a relatively standard format for the text is used for all volumes. The goal of the series is to provide an up-to-date clinical overview of the major areas of ophthalmology for students, residents, and practitioners in all the healthcare professions. This package contains the following products: 9781451101461 Garg Color Atlas and Synopsis of Clinical Ophthalmology—Uveitis 9781451110876 Nelson Color Atlas and Synopsis of Clinical Ophthalmology—Pediatric 9781609132651 Penne Color Atlas and Synopsis of Clinical Ophthalmology—Oculoplastics 9781609133382 Rapuano Color Atlas and Synopsis of Clinical Ophthalmology—Cornea 9781609133368 Fineman Color Atlas and Synopsis of Clinical Ophthalmology—Retina 9781609133371 Rhee Color Atlas and Synopsis of Clinical Ophthalmology—Glaucoma 9781609132668 Savino Color Atlas and Synopsis of Clinical Ophthalmology—Neuro-ophthalmology

This text is part of the Color Atlas and Synopsis of Clinical Ophthalmology which was developed at Philadelphia's famed Wills Eye Institute. The beauty of this series is the powerful combination of illustrative photographs and a summary approach to the text. While the seven ophthalmic subspecialties in this series—Cornea, Retina, Glaucoma, Oculoplastics, Neuroophthalmology, Pediatrics, and Uveitis—employ varying levels of visual recognition, a relatively standard format for the text is used for all volumes. The goal of the series is to provide an up-to-date clinical overview of the major areas of ophthalmology for students, residents, and practitioners in all the healthcare professions. Cornea, Second Edition, presents guidelines for the differential diagnosis and treatment of cornea diseases as seen by the ophthalmic resident, general ophthalmologist, and the cornea specialist. The book uses color photographs of the important corneal, anterior segment, and external diseases with an outline format to succinctly illustrate and describe these conditions. Each section covers the clinical features of the important cornea and external eye diseases, diagnostic tests, differential diagnoses, and treatment. This atlas features more than 440 full color photographs important corneal, anterior segment and external diseases.

Designed for the busy clinician, the Clinical Eye Atlas briefly summarizes the key features of the many different disorders encountered in daily practice. This distillation of essential knowledge provides the information necessary to secure a diagnosis, select targeted tests, and initiate effective management. Color illustrations complement the comprehensive topic outlines, giving the clinician a straightforward reference to turn to when confronting both common and uncommon disorders of the eye.

Quick reference and color atlases covering 5 sub-specialties in ophthalmology. Each book will cover the following areas: Epidemiology and Etiology; History Physical Examination; Differential Diagnosis; Laboratory and Special Examinations; Diagnosis; Prognosis; Management
With the current rapid development of ophthalmic sciences, it is difficult for ophthalmologists to remain fully up to date with all areas of clinical specialty. The second edition of this atlas describes the latest advances in clinical ophthalmology. Each chapter deals with a separate part of the eye, discussing different diseases and disorders that may be encountered by ophthalmologists. Each condition is accompanied by concise descriptions of major and minor signs, as well as detailed photographs illustrating the disease. This comprehensive new edition features 3750 full colour images and illustrations, including more than 600 additional photographs. Images from the first edition have been replaced with better quality photographs taken with the Haag-Streit BX-900 Photo-Slit Lamp and the Zeiss FF 450 Plus Fundus camera. Key points Comprehensive, new edition bringing ophthalmologists up to date with the latest developments in clinical ophthalmology Each chapter deals with separate part of the eye Features 3750 full colour images and illustrations Includes more than 600 additional photographs Original images replaced with high quality new versions Previous edition published in 2006

This text is part of the Color Atlas and Synopsis of Clinical Ophthalmology which was developed at Philadelphia's famed Wills Eye Institute. The beauty of this series is the powerful combination of illustrative photographs and a summary approach to the text. While the seven ophthalmic subspecialties in this series, Cornea, Retina, Glaucoma, Oculoplastics, Neuroophthalmology, Pediatrics, and Uveiti, employ varying levels of visual recognition, a relatively standard format for the text is used for all volumes. The goal of the series is to provide an up-to-date clinical overview of the major areas of ophthalmology for students, residents, and practitioners in all the healthcare professions. This book is intended to provide comprehensive ophthalmologists, ophthalmology residents, and retina and cornea fellows with a single-volume, easily accessible resource covering all the major aspects of ocular inflammatory disease. It will also be useful for subspecialists who are looking for an up-to-date, concise review of the field. The book features more than 3750 full color illustrations throughout and a short, succinct format which includes Epidemiology and Etiology, History, Physical Examination, Differential Diagnosis, Laboratory and Special Examinations, Diagnosis, Prognosis, and

Management.

Portable, practical information at a glance In ophthalmology, visual diagnosis is the most crucial part of an examination. This handy atlas is designed to help busy clinicians identify clinical signs and symptoms, establish differential diagnoses, and work through complex clinical questions -- efficiently and accurately. The Pocket Atlas of Ophthalmology features: More than 500 photographs, line drawings, and diagrams Precise clinical descriptions of all major disorders Color-coded tabs for easy access Easy-to-follow bulleted lists and flow charts Side-by-side comparison charts for differential diagnosis Succinct overviews of ocular anatomy and physiology Valuable tips and techniques for diagnosis and treatment Chapters on drug side effects and eye diseases in developing countries Also useful as a study guide or patient information aid, the atlas also includes a detailed index and numerous cross-references. Compact, durable, and packed with information, this volume slides into any lab coat pocket, making it the ideal clinical companion for all eye care professionals.

The Clinical Ophthalmology Test-Yourself Atlas new edition is a more valuable aid to examination success than ever before. The topics covered have been expanded, and extra images and questions have been added throughout. The book has been completely redesigned and re-formatted to be more user-friendly, and it now provides a handy reference and revision guide that can be conveniently referred to at any time. A new online website presents all the questions and images in varied formats so you can interactively assess all aspects of your knowledge by the most effective means possible. You can work through questions thematically using the 'in the classroom' mode, or alternatively choose the random 'in the clinic' mode that mimics the arbitrary presentation of cases in clinical practice. With its variety, flexibility and instant feedback, the online self-assessment tool provides a thorough, challenging and stimulating way for students to review and consolidate their knowledge. Online assessment presents all questions and images in interactive format. Two modes of assessment test all aspects of your knowledge with instant results. Redesigned with new format and handy trim size. Over 1000 colour illustrations, many of which are new. More questions, more pathology, more histology.

Thoroughly updated and revised, with a new set of questions, this challenging and informative self-assessment book continues to thoroughly test the candidate's knowledge.

The updated Second Edition of this atlas is the definitive pictorial guide to differential diagnosis and treatment of virtually every presenting condition seen in ophthalmologic practice. Specialists from the prestigious Wills Eye Hospital share their expertise in diagnosing and treating congenital and acquired disorders affecting the internal and external structures of the eye. The superb collection of 1,422 illustrations--1,217 in full color--includes sonograms, radiographs, clinical photographs, photomicrographs, and anatomic drawings. This edition features more information on stem cell and genetic research, more radiographic images and explanations of those findings, and descriptions of current methods of laser surgery. A CD-ROM based on this atlas is also available. See Media listing (Montzka) for details. The atlas and CD-ROM can be purchased together as a money-saving package. A Brandon-Hill recommended title.

Featuring the clinical expertise of respected authorities in the field, the second edition of Color Atlas of Ophthalmology is a lavishly illustrated atlas designed to guide clinicians through the accurate diagnosis and appropriate management of the full range of ophthalmic disorders. For each disease or condition, the book provides full-color clinical photographs that are supplemented by succinct descriptions of symptoms, associated findings, differential diagnosis, and management. Features: Concise text and bullet-point format enables rapid reference and review of important topics More than 600 new high-quality illustrations and photographs depict key concepts Coverage of current medical management and surgical treatments includes discussion of the latest refractive surgery techniques and treatments for cataracts Consistent presentation throughout the book enhances ease of use This pocket-sized atlas is a valuable resource for clinicians, residents, and students in ophthalmology, optometry, primary care, and emergency medicine.

"Developed at Philadelphia's famed Wills Eye Institute, the series presents unmistakable guidelines for the differential diagnosis and treatment of the full range of ophthalmic problems. For each condition there are photographs coupled with salient points of epidemiology, history, physical examination, differential diagnosis, laboratory and special examinations, disease course, and up-to-date treatments. The Series is a unique combination of text, quick reference, and color atlas, covering every essential sub-specialty in Ophthalmology including pediatrics. Each title features more than 150 color illustrations throughout and a short, succinct format which in most cases, includes: Epidemiology and Etiology, History, Physical Examination, Differential Diagnosis, Laboratory and Special Examinations, Diagnosis, Prognosis,

and Management. The book is designed as an aid to the diagnosis and management of Vitreoretinal disease in the care of patients and as a resource for the student and trainee"--Provided by publisher.

To fully understand a sophisticated graphics program like CorelDRAW 8, it's important to read the documentation. However, many tips, tricks, and insider secrets just aren't covered in the user's manual. You could probably find some of this information by scouring the Internet or talking with fellow CorelDRAW users, but now there's an easier way to get the full scoop on CorelDRAW -- and it comes complete with tutorials and samples. CorelDRAW™ 8 Secrets helps you take advantage of the program's exciting new capabilities and undocumented features. The book reveals the techniques for harnessing CorelDRAW's hidden power and unlocking your creative talents. Learn how to customize your workspace, discover new tools, create distortion effects, build custom palettes, design Web projects, and much more. The CD-ROM features a 30-day trial version of Corel WebMaster Suite, along with sample images, tutorials, and plug-in demos from MetaCreations -- including Kai's Power Tools.

- This compact pocket edition of clinical ophthalmology explains and depicts various common and uncommon diseases and disorders in ophthalmology through very useful photographs - Includes a wide spectrum of pictures to enable students recognize the diseases that start from the eyelids to the retina and cause ocular injuries - It will assist all ophthalmologists and postgraduate trainees by serving as a ready reference during busy clinical schedules - Helps to clearly understand what is described theoretically in the textbook in general and covers depictive aspects showing diseases of the conjunctiva, uvea, lens, vitreous and retina, optic nerve, the orbit lacrimal apparatus, glaucomas, anterior chamber and pupillary abnormalities, motility disturbance and squint.

Developed at Philadelphia's world-renowned Wills Eye Hospital, the Color Atlas and Synopsis of Clinical Ophthalmology series covers the most clinically relevant aspects of ophthalmology in a highly visual, easy-to-use format. Vibrant, full-color photos and a consistent outline structure present a succinct, high-yield approach to the seven topics covered by this popular series: Cornea, Retina, Glaucoma, Oculoplastics, Neuro-Ophthalmology, Pediatrics, and Uveitis. This in-depth, focused approach makes each volume an excellent companion to the larger Wills Eye Manual as well as a practical stand-alone reference for students, residents, and practitioners in every area of ophthalmology. The updated Cornea volume includes: - Guidelines for the differential diagnosis and treatment of cornea diseases as seen by the ophthalmic resident, general ophthalmologist, and cornea specialist. - New information on infections and new complications of corneal surgeries. - More than 450 high-quality photographs of important corneal, anterior segment, and external diseases, many new and updated for this 3rd edition. - Up-to-date coverage of the clinical features of key cornea and external eye diseases, diagnostic tests, differential diagnoses, and treatment. - In addition, there are over 430 NEW images available on-line to augment the photographs in the text Enrich Your eBook Reading Experience with Enhanced Video, Audio and Interactive Capabilities! - Read directly on your preferred device(s), such as computer, tablet, or smartphone - Customize for your language, including right-to-left reading, vertical writing, and enhanced annotation in over 30 languages - Easily convert to audiobook, powering your content with natural language text-to-speech - Adapt for unique reading needs, supporting learning disabilities, visual/auditory impairments, second-language or literacy challenges, and more

This atlas examines developments in clinical en face imaging, comparing methods and devices and evaluating the most clinically efficient techniques. Divided into three sections, the first part introduces the principles of OCT (optical coherence tomography) and the anatomy and histology of the retina and surrounding area. The second section discusses en face OCT in diagnosing and treating different ocular diseases and disorders. More than 1000 pathological images obtained using different OCT devices are included. The final part describes future developments in the technological and scientific aspects of OCT

and their clinical applications. Key points Evaluates clinical en face OCT techniques for numerous ocular diseases and disorders Each case includes pathological images from different devices for comparison Internationally-recognised European and US author and editor team

Clinical Atlas of Canine and Feline Ophthalmic Disease provides an image-rich resource for diagnosing and treating ophthalmic conditions in clinical practice. • Presents more than 600 high-quality color photographs depicting commonly encountered ocular conditions in dogs and cats • Includes multiple images for each disease to show varying presentations • Organized for easy reference, covering the most commonly encountered conditions first • Designed for daily use in the busy clinical setting, allowing practitioners to quickly find and compare images as they see cases • Provides a concise summary of the most clinically relevant information on diagnosing and managing ophthalmic disease

Identifies complications of the eyelids, lacrimal apparatus, and orbit, such as lesions, inflammation, malpositions, infections, and tumors, and describes how to treat these conditions with plastic surgery.

Through eight outstanding editions, Kanski's Clinical Ophthalmology has been the classic specialty textbook, providing the perfect ophthalmology foundation for trainees and a valuable reference source for experienced practitioners.

Building on the previous edition by Dr. Brad Bowling, Dr. John Salmon from Oxford University has comprehensively revised the textbook. The 9th Edition retains Dr. Kanski's highly effective format of succinct text and visually dynamic presentation, providing authoritative, focused guidance on the diagnosis and management of ophthalmic disorders.

Extremely well organized and comprehensive in scope, this visually stunning book reflects the latest advances in the field, facilitating quick comprehension to enhance learning, aid exam preparation and guide clinical practice. As a general ophthalmic textbook, this is the gold standard. Uses targeted text, bulleted lists, tables, and visual aids to highlight salient points across all ophthalmology subspecialties. Includes 2,600 illustrations, including more than 1,000 new images of common and rare conditions and arrows to show the exact pathology. Features detailed updates on new therapeutic interventions for neurological disease and ocular tumours; new imaging techniques such as OCT, OCT angiography, and MRI; and new topics such as circadian rhythms, graft vs host disease and the effects of Ebola virus infection on the eye. Presents examination techniques in a new, separate chapter and contains new "tips" on key issues in every chapter. Provides up-to-date information on hot topics such as intravitreal treatment with anti-VEGF agents for macular disease, genetic advances in hereditary retinal dystrophies, the use of biological agents in the treatment of uveitis and scleritis and new surgical advances such as MIGS for glaucoma and limbal stem cell grafting.

Color Atlas of Veterinary Ophthalmology, Second Edition provides a compendium of the clinical appearance of ophthalmic diseases likely to be encountered in small, large, or exotic animal practice. Offers a pictorial reference to the clinical appearance of diseases and conditions of the animal eye Presents multiple presentations of most ophthalmic diseases to show the varying ways the condition might appear Provides more than 1,000 high-quality color clinical photographs showing ocular disorders Includes new introductory chapters on ocular anatomy, the ophthalmic exam, and clinical findings in place of the clinical signs chapter Covers clinical history, the clinical signs and findings associated with the disease, the rule-outs or differential diagnoses, the recommended treatment, and the prognosis for each disorder

Everything You Need to Make Quick, Accurate Clinical Diagnoses of Ocular Diseases Clinical Ophthalmology Atlas is a time-saving, highly accurate resource designed to aid in the diagnosis and treatment of all types of ocular disease. This comprehensive volume covers the full spectrum of common and uncommon eye diseases, identifying and describing each disorder with more than 2,000 high-quality, full-color photographs and concise, clinically-relevant text.

This colour atlas is intended as a companion guide to Principles and Practice of Ophthalmology, by Albert and Jakobiec. It provides pictorial coverage of a range of ocular diseases and conditions encountered in daily practice.

"There are significant barriers to its study beyond the constricted pupil. Ophthalmology trainees first acquire the observational skills and facility with diagnostic instrumentation such as the slit lamp biomicroscope"--Provided by publisher.

The new Color Atlas and Synopsis of Clinical Ophthalmology Series is a unique combination of text, quick reference, and color atlas, covering every essential sub-specialty in Ophthalmology including pediatrics. Each title features more than 150 color illustrations throughout and a short, succinct format which in most cases, includes: Epidemiology and Etiology, History, Physical Examination, Differential Diagnosis, Laboratory and Special Examinations, Diagnosis, Prognosis, and Management.

"A definite visual feast, this book is a prize for any bookshelf." (American Journal of Ophthalmology, review of the last edition) The 3rd Edition of this critically acclaimed source offers unparalleled visual guidance on state-of-the-art ocular diagnostic imaging, pathology, and surgery. More than 3,400 outstanding photographs and line drawings (over 1,800 in full color) richly capture a full range of common and uncommon eye disorders and the methods used to treat them. Features contributions from 20 world-renowned authorities. Discusses examination, investigation, and diagnosis for each ophthalmic syndrome, as well as relevant embryology, histology, pathology, and ocular manifestations of systemic disease. Offers an organization both by chapter and by ophthalmic subspecialty, making information easy to find. Depicts the very newest imaging and pathology studies and their findings. Covers the latest refractive surgery and LASIK techniques. Delivers over 1,000 completely new illustrations—3,400 in all—over 1,800 in full color.
