and Satan have been driven underground. The insane are treated by making their delusions real. Jail is a place to break into. Government is lost in the mapless Octagon. And science has given birth to superstition. Where? In America. When? Less than forty years from today. The period following the death of a loved one can be a time of great turmoil. This sensitive book acts as a supportive road map through the initial period of loss, and through the weeks and months that follow. The authors address not only the emotional and spiritual aspects of bereavement, but also important and often overlooked practical considerations such as dealing with wills and other paperwork, disposing of personal possessions, making arrangements for funerals and memorial services, coping with the anniversaries of a death and resolving family conflict. Drawing on many real examples, they offer compassionate, realistic advice on dealing with guilt and other negative emotions, as well as helpful guidance on how and when to break the news of a death to others, including to children, people with learning disabilities and people with dementia. This will be an invaluable guide for anyone who has experienced, or who is facing, a bereavement. It will also be of

In this book I discuss how profound it is to have faith and to push forward, even though that may not be so easy to do. I share my wants and to a certain extent my fears . I preach what I believe. There's a message for the younger generation and the black community. We have to really come together as one in order to make the change that generations to come will see. It's all in this book.**

advanced in every way than earth. There is a federation of ten planets with which there are social and economic ties, earth being too backward is seen as being a protectorate of the major planet and a none member of the federation. The story line is to look at earth as it was, and how it will be several millenium in the future. In many ways the story is meant to be a spoof on our world as it is now, and its many shortcomings in the inability to spread our resources fairly to all mankind. Any apparent political or financial bias ar purely coincidental and just part of the story.
