

Outlines Of Practical Histology

Excerpt from Outlines of Practical Histology: A Manual for Students The present work was written primarily to meet the wants of the students attending the course of instruction in Practical Histology in The Owens College, but it is hoped that it will be found useful also to students of medicine and science in other colleges and universities. The Exercises printed in small type are intended for Senior Students and for those attending the course of Advanced Histology given in The Owens College. Although a drawing accompanies almost every

exercise, still this is not intended to relieve the student from what is a most important part of the training in Practical Histology, viz., that the student should make sketches of his preparations. It serves very little useful purpose to give students sections ready prepared, and ask them merely to mount them. Hence, consider able stress has been laid on methods, as a knowledge of these is, after all, one of the most important parts of a practical training in Histology. Many methods have been tried and found wanting, and accordingly those only are introduced which the author, after experiment, has found to be reliable. About the Publisher Forgotten

highest quality reproductions of fiction and non-fiction literature that has stood the test of time. The many thousands of books in our collection have been sourced from libraries and private collections around the world. The titles that Trieste Publishing has chosen to be part of the collection have been scanned to simulate the original. Our readers see the books the same way that their first readers did decades or a hundred or more years ago. Books from that period are often spoiled by imperfections that did not exist in the original. Imperfections could be in the form of blurred text, photographs, or missing pages. It is highly unlikely that

Our staff has thoroughly reviewed every page of all the books in the collection, repairing, or if necessary, rejecting titles that are not of the highest quality. This process ensures that the reader of one of Trieste Publishing's titles receives a volume that faithfully reproduces the original, and to the maximum degree possible, gives them the experience of owning the original work. We pride ourselves on not only creating a pathway to an extensive reservoir of books of the fine

for the preparation of each of the tissues and organs of the body for microscopic purposes. No method is introduced which he has not found from repeated trials to be successful. The methods described are those which, after nine years' experience in the teaching of practical histology, he has found to be really reliable.
