In recent years, much mainstream development discourse has sought to co-opt and neutralize key concepts relating to empowerment, participation, gender, sustainability and inclusivity in order to serve a market-driven, neoliberal agenda. This book plays a crucial role in combatting this by analyzing the systemic changes needed to transform the current world to one where economic and social justice and environmental integrity prevail. The Essential Guide to Critical Development Studies takes a critical look at the crises - economic, political, social and environmental - of the dominant current global capitalist system. The chapters collectively document and analyze these crises and the need to find alternatives to the system(s) that generate them. To do this, the global empire are placed at the centre of discussion, in contrast to markets, liberalization and convergence, which characterize mainstream development discourse. Each contributor supplements their overview with a guide to the critical development literature, thereby providing scholars and students not only with a precis of the key issues, but also a signpost to further readings. This is an important resource for academics, researchers, policymakers and professionals in the areas of development studies, economics, gender studies, history, anthropology, agrarian studies, international relations and international political economy.
